Summary

An entry-level software engineer with experience using React, Node.js, Express, PostgreSQL is looking for a new full time opportunity. Also having a background in Product Management, I have a passion for creating powerful products. The notion that I can build tools that will help people and solve problems on a large scale is what drives me to rise up the challenges I face and constantly learn as much as I can. Dependable, detailed-oriented and with a strong ability to learn quickly, I aim to join an organization where my technical skills can cultivate.

Skills

Front-end: JavaScript, ES6, React, Express, jQuery, HTML5, CSS3
Back-end: Node.js, PostgreSQL, JWT, Mocha & Chai, Jest, Enzyme
Additional: Git, GitHub, Chrome Dev Tools, React Tools, Heroku, Zeit, Jira, Trello

Recent Projects

Thoughtful Travels | GitHub | Live
- Planned, designed and wrote all front-end & server-side code for this application that aims to empower it's users by giving them a place to organize their travel goals and reflect on their experiences.
- Tech: React.js, Node.js, Express, Knex.js, PostgreSQL **-** Implemented with user JWT authentication, utilizes SQL database and has functionality of all CRUD operations

Catalan Repetition | GitHub | Live
- A tool that allows users to practice learning the Catalan language through the spaced repetition technique.
- I led the front-end design and implementation, as well as laid out the back-end structure for this paired project.
- Tech: React.js, Node.js, Express, Knex.js, PostgreSQL **-** Implemented with user JWT authentication, utilizes SQL database and has functionality of all CRUD operations

Folkul | GitHub | Live
- Designed the UX/UI as well as the database schema for this application. Led the team to keep on track of sprint goals and deliverables for both front-end and back-end.
- This application is a social media concept that allows users to connect with others profiles and share/collaborate on their created ideas.
- Tech: React.js, styled components, Node.js, Express, Knex.js, PostgreSQL **-** Implemented with user JWT authentication, utilizes SQL database and has functionality of all CRUD operations

Experience

TRUSTWORK   Austin, TX
Program and Product Manager   June 2018 – July 2019
- Strategized among company founders, CEO, Head of Product & Head of Engineering to establish the product roadmap
- Conducted user research and testing utilized in establishing product direction and setting product goals
- Gathered and analyzed current data patterns to prioritize product backlog, bugs, requests and new features for each sprint
- Launched innovative features making a direct impact across 60 real estate properties with a monthly revenue of $500K
- Directed and collaborated with the distributed design team to conceptualize intuitive consumer experience

FILL IN THE BLANK STUDIO   Houston, TX
Photographer   August 2014 – July 2017
- Represented the firm while communicating with locally-based influential figures to promote our brand
- Exhibited versed communication skills with partners, patrons and co-workers to establish a well functioning workplace
- Coordinated clients and staff systematically to allow each photo-station to run efficiently

Education

Thinkful   April 2020
Full Stack Engineering Immersion
- Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, jQuery, Node.js, React, algorithms and data structures
- Created and deployed mobile-first applications while learning new languages and frameworks by collaborating with senior web developers

Texas State University
BBA Management, Concentration in Entrepreneurial Studies   June 2018
- Management of Organizations, Business Communications, Business Calculus
